

The Government of Sark

SECURING SARK'S FUTURE (SSF)

Sustainable, Reasonably Priced Electricity

UPDATE TO PUBLIC CONSULTATION

The priority within the Government policy SSF is to provide sustainable, reasonably priced electricity for the Island. The Sustainable, Reasonably Priced Electricity Policy Development Team have brought the draft law "The Control of Electricity Prices (Sark) Law, 2015" to Chief Pleas for public consultation. The consultation period ends on Monday 30th November 2015.

Following early responses commenting on the length of the draft law an Explanatory Memorandum has now been posted on the Government website to explain the main purpose of the draft law.

The Sustainable, Reasonably Priced Electricity Policy Development Team welcomes comments on the proposed legislation, from as many Sark residents as possible.

The draft Projet de Loi and Explanatory Memorandum are available on the Sark Government website, at www.gov.sark.gg (see Law & Ordinances). They are also available to view at the Committee Office during public opening times.
